A: raspi-config I tried the following via the command line: sudo raspi-config The following is the output of running this command: sudo raspi-config Graphic console autologin desktop gnome Authentication Enter username and password for pi: Use existing user? (Y/N): Y No default password set Shutting down system Rebooting in 10 seconds.. OK Exit from raspi-config? [ESC] Edit /etc/ssh/sshd_config to change port to something other than 22 (default) sudo nano /etc/ssh/sshd_config And change the port line: Port 22 To this: Port 9009 Restart the SSH server using the command: sudo service sshd restart Then restart your Pi: sudo reboot NOTE:If your Pi doesn't restart, try these commands: sudo service sshd restart sudo service networking restart Exit from raspi-config? [ESC] Q: Given a set of points on a plane, find a perimeter and a geometric center of the points. Given an arbitrary point set P in a plane, how can we find the perimeter and a geometric center of the points? And given the perimeter, how can we find the center? A: Consider the points in P as the vertices of a convex polygon. Any half-circle from the center of the polygon to a point in P is the chord of the polygon. The length of the chord is the perimeter of the polygon. Q: Why is the block of code for painting not working? I wanted to write a code that would make a circle. The only thing I haven't written is the part for painting. As of now, I'm confused about what is going wrong. I have seen similar code being posted online. This one, I have just copied and pasted it. Can someone point me where am I going wrong? using System; using System.Collections.Generic; using System.Linq; using System.Text; using System.Threading.Tasks; using System
