Since the game is based on the popularity of the XIV series, the creation team has applied the meticulous development that has marked the past series and created a brand new fantasy action RPG that is suitable for both longtime fans and newcomers to the series. The action game has a strong sense of pace, and the voice acting is done in a balanced level with music that evokes a sense of adventure. The thrill of exploration will test your strength while the intensity of battles will enthrall you. It is an action fantasy RPG that combines the timeless enjoyment of classical fantasy

To be honest, the announcement is too late for me. ;) But after knowing that there will be more characters and it will be longer, I'm waiting. :) I really like the story and the way it was going. Now that you mention it, there were little things that made me want to start playing that I don't think I noticed in the original. :D You have a good point. Too bad for you that late game was out of reach. :) I usually play action RPGs so I wasn't used to turn-based or to think about my actions in detail. For me, there were times when I was just enjoying the story, but it also happens that I get bored during a game, so I had to check other games. :)Q: Mysql(PHP) : strange mysql\_fetch\_array return? I have an issue with a mysql\_fetch\_array. I am trying to make a little dashboard : when I enter with this script a number, it will display the corresponding line of a table. I think that it is not the best way to do it, but I don't know exactly how to do it correctly. Here is the part of my code to explain more precisely : if(!isset(\$\_SESSION['username'])) { header('Location:index.php');
