Time has passed since the towering King Ancar settled in the Lands Between. Seeing the thousands of living creatures that call the land their home, he resolved to protect them and cherish them. However, due to the obsession and lack of humanity that surrounded him, a second King rose in the darkness of the Lands Between. His despotic pride has continued to grow, until at last he was struck down by the explosion of the shattered lands below him. As the lands below shattered the surface of the ocean, a new one rose in their place. In the remaining darkness, the shards of the shattered lands are buried under the surface of the new land, together with the bodies of Ancar and his lieutenants. Although the souls of the dead have departed, life is still present in the Lands Between, and many living creatures live together peacefully. Many years have passed since the birth of the new land. Ancar is long dead, but his true legacy remains in the present. In a land full of life and beauty, an immortal spirit of immense power has been reborn... ◆The Character Class System The character class system, first introduced in the 2014 title, 'The Elden Ring' will be newly established. Players can freely choose their desired class and develop their own party by combining different classes. Classes are designed to create a synergistic effect when used in combination. For example, an 'Elden' class that uses magic in the middle rank of the skill tree requires other classes to implement certain mechanics, while a class using physical abilities in the high rank of the skill tree is lacking in magic skills. By adjusting various combinations of skills and abilities, players can create an optimal class which suits their play style. Classes are divided into two types: Base classes and Extra classes. Base classes share their effect with Extra classes that equip them. However, when the effect of Base classes become large, additional effects become available when Extra classes are equipped. Extra classes can then have their own effect once they have been fully combined. 2. SLAVE The Slave class is the ultimate command class. It gives a powerful effect, and can be used with various classes, but it can be limited by the number of times it can use the effect. - 3. VISA The Visa class is a support class with a strong concentration of magic and damage and can be fully combined with other classes. - 4
