This composition is an eerie ambient electric guitar piece inspired by popular science fiction movies like Blade Runner, Alien and Neill Blomkamp's two film Oats. It is a bleak soundscape of loneliness, isolation, and abandoned landscapes. Composer Joel Steudler likes to play in the studio with his 2 brothers and several

friends or in live venues with a looping pedal. Programming note: the tracks are intended to be played in ascending or descending mode without repetition. By choosing ascending or descending mode with repetition or volume in a single track, you can edit only the minor or major seconds of the pitch for both tracks. This will produce the best possible sound with the least bitrate. About the composer: Joel Steudler began writing music for video games when he was 12 years old, publishing his first piece at the age of 16, and has been composing professionally for many years now. He is best known for his work with RPG Maker (RPG Maker, RPG Maker XP), Deus Ex: Human Revolution, NFL Street, Mortal Kombat, Mortal Kombat X, Windjammers, Shadow Complex, Saber Marionette J, Shadow Complex 2, Dark Void, and other game projects. He is also an active composer on the osu! team, leading a project for an RPG Maker map set in the legendary Final Fantasy world. You can find his compositions in Deus Ex: Human Revolution and Shadow Complex, his contributions to osu! being as impressive as they are diverse. Future work Joel plans to release the Apocalpse Mission Pack and the The Truth - Soldier's Heart Is The Truth, part 2, these two packs will be on a waiting list.
