Unite the most beautiful warships and strategic warfare with higher faction hullclasses. One of the unique features of HighFleet are the tactical commands, an innovative system that combines precision and immediacy in action. The game is set during the late 21st century in an alternate history timeline in which earth has developed spacefaring technology. Follow the action in the thrilling megagame, where the two alliances are pitted against each other. Base Game Greetings! Thank you for taking the time to play our game HighFleet! We hope you enjoy the experience, that is where we get our inspiration for HighFleet. The game is a small example of a megagame. Megagames are games with an extraordinary complexity that we can not plan in advance. You can be a part of these megagames with your own personal involvement and military heritage. We've put a lot of effort into the base game and we hope it will become the definitive simulation naval warfare experience. The base game is divided into five factions. The game features a single map that revolves around the battle of Salerno, where ten hexes are painted. The single Map has two viewing perspectives: (1) a tactical overview with maps and orders, and (2) an overview of the entire battlefield with objectives and flag positions. HighFleet is set in the near future. Around the year 2700, spacefaring technology has made its way to the Earth. Nations have formed into two alliances. Each alliance has its own headquarters to direct operations and to operate their fleets. As a player, you act the part of an admiral, leading your fleet into one of five battle scenarios: The Scenarios feature two or more battles that take place on the map. Each battle includes an order phase, where you plan your strategy, and a battle phase where you can move your forces on the map. For some factions, the game offers the possibility to field a powerful starship and use a force of destroyers. We hope you enjoy playing HighFleet and look forward to hearing your feedback! Thank you again for playing HighFleet, Richard Phine HighFleet Team HighFleet is a strategic game of fleet games. Stealth: The Hidden, The Invisible: Why Play HighFleet? There is a reason the media—beside reporting on hot topics in the limelight—don't like to write about the Roman Reigns' feud with the soon-to-be-crowned United States champion John Cena. It's too easy for someone to get hit with that if... There is a reason the media—beside reporting on hot topics in the limelight—don't like to write about the Roman Reigns' feud with the soon-to-be-crowned United States champion John Cena. It's too easy for someone to get hit with that "if/then" scenario when defining the feud. If Roman Reigns wins the belt against his rival or Cena loses, then you don't write about this. If Roman Reigns loses the belt to Cena or the feud is over, then you don't write about this. The two men became main eventers from the opening bell of WrestleMania 33 in Anaheim, California. However, as far as the animosity on the August 7 edition of SmackDown, Reigns and Cena exchanged blows and exchanged words right off the bat. This feud has clearly been building all year, but The Rock and Becky Lynch taking turns between the two main events during the show made things a bit more interesting. In this saga that has lasted more than a month, Reigns has been the most dominant and the new champ, playing up the fact that this was a big step up from being champion to championing an entire generation of United States fans. This was not his last title defense. Now Roman Reigns is the main headliner at the biggest wrestling show of the year. However, Cena began the "main event" of the show in the very first segment with this match against Reigns. A major part of Roman Reigns' slant on the feud is how the competition helped him. Reigns defended his United States Championship against Samoa Joe after having arguably the biggest match of his career against John Cena in the "Summer Slam Hell in a Cell" Ladder
