Does the monovalent influenza vaccination affect risk of respiratory tract infection in patients with chronic obstructive pulmonary disease? Respiratory tract infection (RTI) is a major cause of hospitalization and treatment in patients with chronic obstructive pulmonary disease (COPD). Although influenza and respiratory syncytial virus can cause an increase in infection-related morbidity and mortality in this population, influenza vaccine is not routinely recommended. The aim of this study was to assess whether influenza vaccine administration protects patients with COPD against RTI. Observational study. Two thousand twenty-eight patients with COPD and at high risk for RTI who attended the outpatient clinic of the GlaxoSmithKline Center for Respiratory Diseases, and who fulfilled the selection criteria of the study were enrolled (49.7% male, mean age 70.2 +/- 9.7 years, mean forced expiratory volume in 1 s 41.5% +/- 12.9% predicted, mean FEV1/FVC 54.3% +/- 11.2%). Influenza vaccine was administered in all patients. One year later, all patients were reevaluated for RTI. Descriptive statistics were used for all variables. RTI occurred in 294 patients during the year before influenza vaccination, and in 275 patients during the year after vaccination. A significant decrease in the number of patients with RTI was observed in patients who were vaccinated against influenza virus, compared with patients who were not vaccinated (43/3883 vs. 157/3725; P Q: I don't understand why I can't use this DTO class to encode and decode Json I have a DTO class like this: public class Order { @JsonProperty("orderid") private int orderid; @JsonProperty("purchaseDate") private e79caf774b
