When I try to run Google Chrome as Administrator, I still see this error and the page remains blank. I have also tried Firefox, it shows a similar error. I have already tried to open the site with other browsers that I have available but it still

doesn't load. What could be the reason? Thank you in advance! A: Try this simple steps: Go to website www.olark.com and click on the Click on the link i.e Site Resolution Center. After the Site Resolution Center, click on the Direct Download a Clean Local Version with no Extensions. You will get a zip file with no extension. Zip it and save as JPEG or PNG to your desktop. Open the file with a Hex editor like notepad++ and then change the file extension from.zip to.exe, and save the file. Right click on the file and select Open. It will ask for admin access. Enter your admin password if not shown. Now you can save the file to your desktop (with file extension.exe). Run the program you downloaded (mex) Enjoy There is another alternative. You can also download Adobe Reader. Install it and follow the instructions to Uncompress the downloaded file. It will make the work more comfortable. Q: How to combine

two pandas dataframes into one with new columns and rows from two dataframes I have two pandas dataframes with the same structure and their names are df1 and df2. I want to combine these two dataframes into one with new columns and rows. I tried to join the two dataframes in pandas and also to concatenate them: `df = pd.concat([df1, df2], axis=1)` `pd.concat([df1, df2], axis=1)` But they didn't work and also gave the same error: `ValueError: Lengths must match to concatenate` I want to get this:

df1	df2
