WinJukebox

The Jukebox controls playback of music files on your computer. It allows you to create and edit music playlists for customizing the Jukebox experience. It supports all formats of MP3, WAV, OGG, WMA and AAC/M4A music files. WinJukebox Setup: - Click the "WinJukebox.exe" link and download the.zip package to your desktop. - Unzip the package and run WinJukeboxSetup.exe. - Follow the instructions on screen. If you need to update a file not found in the package directory, move it to the package directory using the file manager. Installation: - Download the needed updates to your.exe if needed. - Select update.exe and click the checkbox to update. - Wait for the program to update. - Close the program and log on as Administrator. How to Play Your Music: - Put the Jukebox directory in your "C:\ drive" or "D:\ drive". - Change the format of music files from ".mp3" to "wave" or "wav" to get rid of the lock sign (Ex. "e:\song.wav" --> "c:\song.wav"). - If your song files are not playing automatically, type "Jukebox" in the explorer address. - Double click the WinJukebox.exe in your "C:\ drive" or "D:\ drive" or just start it by double click. - Put the music files you want to play and save them in the ".zip" package. - Drop the music files on the "C:\ drive" or "D:\ drive" or just drag them on the Jukebox icon. - Play your music by clicking the music files. - Click "Settings" on the Jukebox icon. - Manage your music files by adding, deleting or copying files. - Click the "Top List", "New List", "Playlist" and "Tabs" icons on the Jukebox main screen. - Click on the music file names you want to play on the "C:\ drive" or "D:\ drive" or just click on the music file. - Click the "Close" icon on the Jukebox main screen. - Then wait for the Jukebox to start listening to the music. Note: - You can edit the "file name" 3a67dffeec

WinJukebox For Windows

WinJukebox is a program used to play your chosen songs to your guests who visit you. First, you should try it for yourself in order to know how it works and how you can play different songs to your guests. Afterwards, you can decide if you want to remove the trial copy that you have. Then, if you want to remove the trial copy of WinJukebox, you should perform the following procedures: 1) Open notepad and type these lines of code there. To do this, right-click on the file then select "Open with notepad", without any tab. 2) Copy and paste the text that you have written there. 3) Save the file then close notepad and start it to have WinJukebox right after it. 4) After that, you need to reinstall the demo version of WinJukebox. You can get the program here: WinJukebox Requirements: * Windows 95/98/98/ME/2000/NT/2003/XP/Vista/7 * Java version 1.2.1 or higher * Java Runtime Environment (JRE) * To use this program, you must have an Internet connection.
