Windows Service Pack 2 SP1 Microsoft Windows XP SP2.iso WindowsÂ .Q: how to save the current session in android? I have an app which is a chatter and video sharing app. In the video sharing app the user can start video sharing. For that i have a broadcast reciever (listen the unread msg or video share complete status). I want to keep the current session when the user will close my application. please suggest how i can achieve this. A: You will need to save the data in SharedPreferences and then read it on startup. Have a look at the SharedPreferences Data Storage Doc To

listen for change in these values you can register a broadcast receiver for any key you would like to monitor Acoustic behavior of cylinders convex and concave to a plane: towards the development of the Biot theory. The acoustic behavior of a plate at a height h above a half-space is described as a function of the wave number, the geometry of the half-space and the dimensionless parameters beta = h/h(lambda), and gamma = h/k(o). For small beta,
