Spiral is a third-person narratively driven exploration game. It takes place in a world inspired by Bernard Penfield's life and cognition experiments. The game is set in the years 1974 and is set to an ambient soundtrack including music from Bernard Penfield's time. An adventure in space Bernard Penfield has a rare disorder called Pick's syndrome, where the brain doesn't create clear memories. It is not clear what causes the illness or what can cure it. Since he has only a sketchy knowledge of himself, he fears his illness to be life threatening and decides to visit the only known aspect of himself, a capsule suspended in the depths of the ocean. The capsule is made of his own brain tissue and contains the record of his entire life. When Bernard touches the capsule, he feels a strong connection to himself. He understands that he has to explore this as a first step in unlocking his past, and so sets out on a journey to explore the depths of his mind. Bernard has a key to the capsule. He can unlock it, but to do so will mean to become a different person. This game is inspired by the life of Bernard Penfield and the cognitive disorders he has. This game is also inspired by the music of Stephen Penfield and the experiments he carried out in the late 1970's. What You Will Experience • Explore the mind of Bernard Penfield, and remember the story of his life • Follow Bernard through a series of memories containing puzzle-like tasks that you will need to solve to help him remember • In-game demo available on the game's Steam page, in which you will play the first 4 chapters of the game and be able to test it out for free • Featuring a unique soundtrack by singer/songwriter Silviu Tiran, using classical music as inspiration for a theme that is deeply connected to the life of Bernard Penfield • Featuring hand-drawn illustrations and a colouring book. Colour the pages with Bernard's memories as they come back to him • Available on PC only, using a modicum of graphics mods to fully render the game. A possible mod to use is DCEmu ***** Version 1.0.1, March 2019 [DOWNLOAD] Additional support for bluetooth hci devices (Windows x64) [DOWNLOAD] Additional support for USB audio devices (Windows x64) [DOWNLOAD] Additional support

Spiral - Episode 1 Features Key:

Main Route: Cosmonaut Lift
Sub Plane: Transfer
Teleporter: Necropolis

The present invention relates to a vacuum cleaner, more particularly, to a direct drive vacuum cleaner for upright type air cleaners, pedestal type air cleaners, canister type air cleaners, and the like. Generally, a conventional direct drive vacuum cleaner has a direct drive motor which mounts directly over a cleaner head. Therefore, the cleaner head also is mounted directly over a dirt receptacle. The cleaner head has a suction opening and a filter mounted in the opening. The filter serves to entrain and trap dirt and other debris. FIG. 1 shows the inside of a conventional cleaner head 1. Referring to FIG. 1, the cleaner head 1 includes a casing 3. The casing 3 has a suction opening 5 formed therein. The suction opening 5 extends through the casing 3 from a first end toward a second end thereof. The suction opening 5 has a fan wheel member 7 secured thereto by means of a support member 9. The fan wheel member 7 is mounted directly to a motor housing 11 mounted inside of the casing 3. The casing 3 is secured to a filter component 15 by a first securing member 13. The filter component 15 is formed of a cylindrical mesh element that is folded into an accordion-like style configuration. A second securing member 19 is used to further secure the filter component 15 to the casing 3. The second securing member 19 secures the bottom and top of the filter component 15 to the casing 3. During assembly, the first securing member 13 is disposed about one of the hinges 17 formed within the casing 3. The first securing member 13 is used to hold the fan wheel member 7 on the motor housing 11. The bottom end of the fan wheel member 7 is placed into the suction opening 5. A first fan wheel 16 is placed on the top end of the fan wheel member 7, which also is secured with the first securing member 13. The first fan wheel 16 is held on the top end of the fan wheel member 7 using a thin first leg 17. The
