For more information about automatic software distribution,. Set the preferred download location to the default download directory.Q: PHP case insensitive multi-string I have a case sensitive multi-string. $string = '$string, $string2'; $re = '^\s*\$str\s+IN\s+["']'; $res = preg_replace($re, '', $string); In regexp expression you can see \s* it will give me a string and then $. But I need it with multiple string but with the case insensitive (?) A: How about: $re = '^\s*\$str\s+IN\s+["']'; $res = preg_replace('/\$str\s*(?i)/', '', $string); It will match the initial part of the string ($str) and any number of times, then add the rest of the string in a case-insensitive manner.
