GAMING NEWS ELDEN RING A brand new IP, developed by G-Style, is gaining enormous popularity and becoming a hot topic in the gaming industry. We interviewed the CEO of G-Style, who had the chance to share the progress of the development and learn more about it. Kazuhiro Hino: I'm not a gamer, so what made you decide to make a RPG? Hirohisa Iwata: I'm a college professor. I had an interest in myths and legends. Unfortunately, I felt that being a professor I had almost no time to enjoy such things. I got interested in the world of Elden Ring and started playing the game. After that, I became passionate about the world of the Elden Ring and the setting of the game. I worked as an IT industry manager before becoming a games developer. How was it like when you started working on the Elden Ring? I started the project around 2011 as an independent company. At the time I made the game, it was a website game that was selling pretty well. I thought the genre was popular and that I could probably sell more. I thought of making it my job if it was to be a popular game. Because of that, I had to make the game popular again. With that in mind, I started exploring new genres, such as RPG, RPG Maker, and Japanese-style RPGs, and set out to make a game with a new setting in the world of the Elden Ring. Have you always dreamt of becoming a game developer? No, it is more like a "tick" job that we do to make money. As I do not have children, I hoped that I could continue being a professor. I was just crazy at the time. Your game designs are something very unique compared to existing RPG games. We hope that players who are interested in the Elden Ring will like it when they play it. I have a certain vision. I'm going to do what I want to do. The way I think is different than the conventional way. I think it is a mania to stick to your own vision. I feel that a great game depends on the main character's customization, so I always make the character's appearance with my own eyes. I do not think it is so much important, but I do it. After that, I make it with a 'different feeling' concept. Also bff6bb2d33

Battle System ULTIMATE FIGHTING - From the basic attack to various special attacks, each of these moves gives players more control over the flow of the battle. - Battle no longer involves setting up and waiting; the battle system is now based on a different concept. It is a highly developed system that determines a battle in real time. - This includes new abilities such as special attacks, and the new "unity" attack. - The "synergy" system now displays a cross-shaped indicator in the right-bottom corner to clearly display the attack effects. New amide derivatives of 5-fluorouracil as ribonucleotide reductase inhibitors. A new series of 5-fluorouracil-thiouracil derivatives have been synthesized and tested for inhibitory activity on cloned ribonucleotide reductase (Pcr and LmR2) from HeLa cells. The R-enantiomer of compound 1 and particularly its enantiomer 22 displayed a potent inhibitory activity against both Pcr and LmR2 enzymes: IC₅₀ = 1 nM versus Pcr and 9 nM versus LmR2. In addition, enantiomer 22 was more antiproliferative than 1 in cell lines sensitive (HT-29 and PANC-1) and resistant to 5-fluorouracil (7R2000) in vitro. Prince Saud Al-Faisal, the Saudi ambassador to UK, recently told The Washington Post that "We've done a lot of interfaith dialogue in London" as part of his country's effort to better form alliances. While that's true, the recently launched Saudi Commission for Tourism and National Heritage (SCTNH) is a new initiative to specifically link the Kingdom's several acclaimed tourist and cultural wonders with the myriad faiths and world philosophies present within its vast borders. The commission is currently finalizing its first tourism project which includes several sites across the Kingdom including the Kaaba... In a world increasingly motivated by fear, uncertainty and doubt
