Human Fall Flat Steamworks Fix V3 Revolt Rar

I've had a bit of a problem so I'm hoping someone can help me out. The problem is that I'm receiving an error when trying to input some characters into my website. The characters which are causing the problem are: -`££ -`€€ I've tried to add charset utf-8; to my file but it doesn't make the problem go away. Could somebody maybe tell me how I could make this work so that I could be able to use those characters in my site's pages. Thanks a lot in advance! Best, Oli A: Try not to use single quotes for MySQL's statements, use backticks instead: INSERT INTO clients (`name`,`lastname`,`user`,`email`,`password`) VALUES ('\$user','\$lastname','\$email','\$password') After that change it to '€' or '£' - like u want. Also, at least in MySQL you can use multiple statements, so you should be doing like this: INSERT INTO clients (`name`,`lastname`,`user`,`email`,`password`) VALUES ('\$user','\$lastname','\$email','\$password'),('£name','£lastname','£user','£email','£password') Edit: If the problem is still there try this: INSERT INTO clients (`name`,`lastname`,`user`,`email`,`password`) VALUES ('\$user','\$lastname','\$email','\$password'),('`££','\$lastname','\$user','\$email','\$password') You can have strings within strings, using backticks, or the `...` notation for that... Edit 2: You can't insert a string that contains backticks, use this instead: INSERT INTO clients (`name`, 0cc13bf012
