[END OF TRANSCRIPT] E-mail: blabla@blablabbbba.com _____ The 2nd question of our indie game developer: Where does the line between what you can and can't do as a game dev sink disappear? I don't think anyone has a clear answer to this question. The lines tend to disappear when you start working on something you're truly passionate about, and then it is hard to say which line you can cross and which line you can't. Generally, you're willing to cross whatever line the game needs in order to produce something you enjoy, so I would say that there isn't actually any strict line that you can cross. Your level of passion will depend on how much of yourself you put into what you're making. You should always have a little part of yourself in all the games you make. I would also say that there is a difference in the amount of time required for creating game and creating game logic. Programming is a fun process because you get to create so many things in one project. You get to create the design, character and game, etc. If you're writing programming code to do something as tedious as progression in a game, it is much harder to feel like you're doing something fun. I hope I answered the question well. The 2nd question of our indie game developer: Where does the line between what you can and can't do as a game dev sink disappear? ==== PaulHoule You know what, I found this to be one of the most refreshing things about Persona 4. If you don't want to play the game as the 'good guy', you don't need to. You can just do the parlor trick of failing the Striving test, and then party members can roll and pick one of the bad guys. As long as one of them fails, they win. That's more or less all the game is about, and I really like how it turned out. TAM-28 (XSEED, NIS America) seems to be a good soft RPG, but it is very expensive at \$60 for a PC game. You could substitute an RPG like Xenoblade for about half the game and get just as much RPG as Persona 4. The whole 'Big Bad' issue feels old now. The biggest bad in a game doesn't even have to be human, it can be an alien space monster or a robot or whatever. ~~~ dilippkumar I find this to be a really great point. Persona 4 is a game I'd recommend to anyone that wants a break from the norm with a game where you don't take antagonistic stances or choose between good and evil. I had an incredible time with it and highly recommend it to anyone interested. ~~~ PaulHoule I think that is why I like it so much, I played a lot of other RPGs that were super heavy on the 'big bad' meme, and Persona 4 was light on that.
