GRAPHICS AND SOUND The graphics and sound are highly sophisticated and beautiful. The pictures and sound effects of the characters are very impressive. GRAPHICS The Graphics are top notch and the map is very clear and provides you information quickly. The characters are extremely detailed and the game really conveys the action and atmosphere. Character details in the menu and introduction screens are great too. This game is great not just for the wow factor but also the details in the levels. There are even animations for each character when you do things like go to a new menu or do quests. SOUND The sound is super clear and detailed, but a bit muffled. Volume is pretty strong, so be prepared to have the game very loud when you are doing activities. The menu sounds very good, and makes it easier to navigate the menus. The voice acting is very good, and it really helps the dialogues. KITCHEN SINK About the game map You have got an avatar in the game - the "character". In the game, you can get information about the area, and it is also an area to collect items and treasures. 2) What kind of map is it? Because of its "ancient wood" or polishing, the surface of a guitar can look relatively smooth and shiny, which gives one the impression that you can see the instrument's wood clearly. However, because a guitar's steel strings are vibrating at high speed when a note is played, the instantaneous vibration and pressure of the strings cause microscopic cracks to form in the wood of the guitar. As a result of this constant pressure and vibrational stress, the wood will gradually lose its structural integrity and deteriorate overtime. For some guitar that are poorly made or poorly maintained (i.e., worn out strings, loose necks, etc.), this natural process can cause the wood to become more fragile and progress towards chipping. Later, when a player is seriously playing this guitar, these fragilities and minute cracks may lead to splitting, or the wood may become less stable under a strong swing of the neck.
