Filter by year only 2009 and 2010, or by year only 2010 and 2011, or more. [Mac] Crack cocaine is made by dissolving cocaine in a chemical. The cocaine is then pumped through a pipe and heated, making into a gluey substance called "crack" that can be smoked. The substance resembles a gray gooey tar in appearance, but is actually very much purer

than other forms of cocaine.. The individual then waters down the crack cocaine and snorts or injects it to feel. . Crack cocaine in the sense of its legal status can be traced back to the Drug Abuse Control Act of 1964. The mixture is simply ground up and heated until it melts into a mass of plastic-like material. The mass is then pressed into pipes with one end rolled closed to seal it and the other open. The open end of the pipe is put into the user's mouth and smoke is inhaled. According to the federal Drug Enforcement Administration, crack is "a smoked mixture of powdered cocaine and sodium bicarbonate,".
