Features: - Endless loop with WAV format files - Control loop from the menu or with the keyboard shortcut - Can't miss the loop when right-clicking the drop-down menu - Easy to use - Runs in the system tray - Control the number of played loops Requirements: - Windows 2000, Windows XP, Windows 2003, Windows Vista, Windows 7, Windows 8, Windows 10 To say that LoopDropZ's user interface is minimalistic would be an understatement; there's just a rectangular box labeled "DROP-ZONE" where you drop your audio files, and they instantly start looping. Because the program remembers all your loops, there's also a drop-down menu from where you can select files that you used before. Right next to this menu is the Play/Pause button... and that's it. But even though the developer wanted to keep the app "idiot-simple" (his words), there are still a few more functions you can access. For example, if you right-click the arrow of the drop-down menu, you get a context menu that lets you add loops to favorites. Or, if you press Ctrl+E, you get a loop list which you can sort. Endless loops for a relaxing sound ambiance There are a few other functions and shortcuts that the developer details on the program's official site. There are also a few interesting ambient sounds which you can download to start enjoying the app right away. Remember that LoopDropZ only works with WAV files, and it doesn't have any file conversion or sound editing capabilities. The sounds will be looped perfectly, without any interruptions, but this will only happen if the audio files don't have any moments of silence at the beginning or the end. Fortunately, there are already many ambient sample packs freely available on the internet that also come in WAV format. If you find
